

## SIZE GUIDE FOR BRACELETS AND BANGLES

Please ensure to print this size guide in A4 format and scaled to 100% before proceeding.  
Place a credit card on the line to check the accuracy of your printout.  
The scaling is correct if the credit card and the line length match.

### STEP 1

Carefully cut out the THOMAS SABO measuring tape and cut a notch on the line labelled 'CUT HERE'.

### STEP 2

Place the measuring tape around your wrist ensuring that the printed side is visible. Slide the measuring tape through the cut opening until it fits tightly around your skin. We recommend measuring the thickest part of the wrist, which is normally at the level of the carpal bone.

### STEP 3

Measure the circumference of your wrist in centimetres. For a comfortable, loose fit, we recommend adding 1.0 cm to the determined circumference.

THOMAS SABO cannot be held responsible for any errors arising from the use of this size guide.
