

## RING SIZE GUIDE

Please ensure to print this size guide in A4 format and scaled to 100% before proceeding.  
Place a credit card on the line to check the accuracy of your printout.  
The scaling is correct if the credit card and the line length match.

### OPTION 1: Measure existing ring

Continue sliding your ring from the smallest circle until the black area completely fills the inside of the ring.

### OPTION 2: Measure your fingers with the THOMAS SABO measuring tape

#### STEP 1

Carefully cut out the THOMAS SABO measuring tape and cut a notch on the marked line.

#### STEP 2

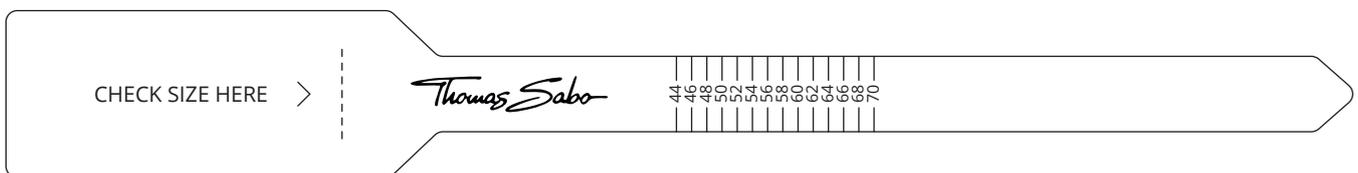

Place the tape measure around your finger so that the printed side is visible.

#### STEP 3

Push the measuring tape through the cut opening until it lies directly against your finger.

#### STEP 4

The number that matches the line at the cut opening is your ring size for this finger.

**Hint: Visit our FAQ section for international size conversions.**

In case you are between two sizes, we recommend that you choose the larger size.  
THOMAS SABO cannot be held responsible for any errors arising from the use of this size guide.
